 - Fullstack Development Bootcamp Rakamin Academy**

Certification

- Bootcamp Fullstack Web Development Rakamin Academy
- Most Outstanding Student in Bootcamp Rakamin Academy
- Fullstack Course by Angela Yu (Udemy)

EXPERIENCE

Web Portal Developer Intern Village Office of Batok
October 2023 – November 2023

- During a two-month internship at the Batok village office, I developed and deployed an online news portal using WordPress to enhance local communication. I gathered requirements, designed the layout, configured WordPress, and added custom features to meet community needs. The successful launch improved information dissemination, providing a central platform for updates and events, and received positive feedback from both residents and the village administration.

Class Coordinator Bootcamp | Rakamin Academy
March 2024 – August 2024

- As Class Coordinator for the IT Bootcamp at Rakamin Academy, I oversaw class sessions by serving as MC, coordinating with students, managing schedules, organizing activities, and facilitating communication between instructors and students. I ensured sessions were engaging and timely by managing the agenda, resolving issues promptly, and maintaining effective communication. This resulted in increased student participation, smoother class operations, and positive feedback from both students and instructors.

Build E-commerce Project (Mini Miracle)

- As part of a development team, I built and maintained key web application components, including backend services using Node.js, Express, and Prisma, and a PostgreSQL database schema. I integrated Midtrans for payments and the Raja Ongkir API for real-time shipping. Additionally, I contributed to frontend development and collaborated on troubleshooting and optimization. The result was a well-integrated system that securely processed transactions, provided accurate shipping data, and met all business objectives.
